calculate with **gross wages** only! i.e. the amount of wage includes income tax and the proportion of social contributions to be paid by the employee

Percentage applied:	1. Year												2. Year				3. Year			
	1	2	3	4	5	6	7	8	9	10	11	12	I	II	III	IV	I	II	III	IV

Information on gross wage:

- ★ make sure that in the cell for gross wage (e.g. D5) you really enter the gross and not the net wage
- ★ Here, **gross wage means:** All of the wage **excluding** the share of social contribution paid by the *employer* (i.e.: your business); that share is calculated and added in the next row below (e.g. D&, based on your percentage entered in B6). So, the **gross wage does include** a) the share of the social contributions paid by the *employee* b) all the income tax still to be paid by the employee
See illustration to the right.

- ★ **FOR EXAMPLE:**
From your business' perspective: If you enter a gross wage of 10000€ (a "round" number for the purpose of calculations), the social contribution you pay on top of that is 21% = 2100€. So in total the employee costs you 12100€. That is all that is relevant to your immediate calculations.
From the employee's perspective: When deciding upon what gross wage to pay, maybe also consider the employee perspective, in order to be competitive and not to set the gross wage too low, consider the following: From the employee's perspective, she/he will receive 10000€ gross wage, but still needs to deduct 21% of social contribution (their share) and income tax, which may be something like 40% = 4000€. Hence, the net income for the employee is 10000€-(2100€+4000€) = 3900€. But as mentioned above: This employee view on wage is irrelevant to your calculations.

Information on social contribution:

- In 2015 the social contribution is calculated as follows (salaries/month):
- ★ For salaries above 450 € use the social contribution rate of 21 %
 - ★ Under 450 € (Mini-Job) the social contribution rate is 31,09 %
 - ★ The exact rates may vary depending on the state, where the firm operates, and on other parameters (casualty insurance, sick insurance ...)

Typical investments and their "useful lifetime" according to German taxation law

- ★ For a much more detailed list please check the link below link to the German Ministry of Finance
- ★ That list can also be found as "AfA Tabelle (AV) Bundesfinanzministerium" (as Excel in their data download; look for "AfA")
- ★ In case you cannot navigate the list in German, you may calculate based on information from foreign tax systems in english. In that case please provide a short note and description of the source (include e.g. as footnote in this table, incl. link)
- ★ In case your business will be taxed in some other country than Germany, please apply the time spans based on the respective taxation law.

Link to German AfA-table (Excel): [CLICK](#)

Some information for Liquidity Planning

- ★ In this chart all the affecting payments are pooled.
- ★ Revenue streams have an initialized time difference of one month. This helps to get rather conservative results. Hence, e.g. the sales revenue in the 3rd Month lead to an incoming payment in the 4th month.
- ★ Payments however affect the liquidity of the same month – because they should be paid instantly.
- ★ Make sure to adapt the Sales Tax on your expenses correctly. You should find out what expenses will be taxed with a rate other than 19% and adjust the reference formula accordingly.
- ★ For more information [please check all the comments](#) in this sheet!

Assumptions & Explanations

1. PROFIT & LOSS STATEMENT

Item	Cost	Period	Reference /Assumption	Further comments
Laptops	€3,173	Year 1		7 laptops: 6 x HP Chromebook Laptops for €379 each and 1x HP Pavillion for €899
Rent	€490	Per month	https://www.berlinstartupoffi/	
Insurance	13,860€	Over 3 years	1- https://www.arag.de/rech/	
Telephone & Internet	3,477.60€	Over 3 years	https://www.voys.co/de/funk	
Legal & Consulting	800€	Over 3 years	https://sevdesk.de/ratgeber/	Calculation : 15,75 x 5 + 17,85 = 96.6 = 97€/ month Year 1: 2 hours, year 2 & 3 : 1 hour each Tax consultant: 200€/hour Cheapest desks and tables we can find from Ikea: 20€ per chair, 6 chairs 29,99€ per desk, 3 desks
Furniture	210€	Year 1		
Database Costs	15.00€/50k users	Per month	https://cloud.google.com/fire	Google Cloud Initial setup costs €9.90 Yearly costs €22.90/year
Postage	€85.60	Over 3 years	https://www.com-magazin.d	
Advertisement	3,252,000	Over 3 years	https://www.businessofapps	The Customer Acquisition Cost (CAC) for apps varies widely, most websites mention a CAC between 15 and 30euro. We assumed we need to spend €20 in advertisement to acquire one paying user, which adds up to €3,252,000 to acquire around 163,000 paying users over 3 years.

2. PERSONNEL EXPENSES

Position	Monthly gross wage	Beginning of employment	Reference /assumption	Further comments
CEO	€2,151.07	01.01.2025	earning a minimum wage of increase of 15% in year 2 & 3	
COO	€2,151.07	01.01.2025	earning a minimum wage of increase of 15% in year 2 & 3	
CPO	€2,151.07	01.01.2025	earning a minimum wage of increase of 15% in year 2 & 3	
CTO	€2,151.07	01.01.2025	earning a minimum wage of increase of 15% in year 2 & 3	
CFO	€1,075.53	01.01.2025	earning a minimum wage of goes full-time in year 2, increase of 15% in year 2 & 3	
CMO	€1,075.53	01.01.2025	earning a minimum wage of goes full-time in year 2, increase of 15% in year 2 & 3	
Minijobber	€538	01.01.2025	fixed salary	

3. INVESTMENT & DEPRECIATION

Angel investors	As part of the seed funding, seeking an investment of €186,000 to cover the first costs, which will help towards reaching break even one year after launch, in 2026.

5. INTEREST PLANNING

GreenBond is not planning to get an interest.

6. ADDITIONAL ASSUMPTIONS & EXPLANATIONS

Assumptions & Explanations

0.A PRICING/REVENUE SCHEME

Item: GreenBond Premium Membership
Price: €4.99
Period: Monthly
Details: Access & discounts to special workshops
Payer: Premium seeking users

0.B REVENUE SIMULATION

	Y1:Q1	Y1:Q2	Y1:Q3	Y1:Q4	Y2:Q1	Y2:Q2	Y2:Q3	Y2:Q4	Y3:Q1	Y3:Q2	Y3:Q3	Y3:Q4
Revenue Stream 1: Subscriptions	4	62.85	636.88	5937.23	94979	156936	294829	535394	913713	1402209	1840487	2049048
Revenue Stream 2: Commissions	3	23	903	1500	3000	3000	3000	3000	4500	4500	4500	4500

GreenBonds main source of revenue is Subscriptions (red)

Subscription Model: Premium Membership: €4.99/month
Expected Serviceable Obtainable Market (SOM): 3 million users
Conversion rate: 10%
Customer acquisition and loss: 5%

Commission Fees: Take rate on workshops: 10%
Discount via green credits: up to 5%
Commission revenue with increasing workshops per year:
10 workshops/month in year 1
20 workshops/month in year 2
30 workshops/month in year 3
Cost of workshops:
each workshop has 20 spots at €50/spot
70% of paying users are projected to be interested in workshops (according to own research from questionnaire)
Paying users likely to earn Green Points and use them for discounts, reducing commission from 10% to 5%.

Numbers of users/paying users and assumptions about the growth rate & loss rate can be found at the bottom of the P&L Statement!!
